

Frozen no_parking pixel-acquisition plan — metadata only

The complete r07 no-parking pool is frozen: 64 candidates across 13 conservative dependency groups. All candidates are retained and ordered round-robin across groups to maximize metadata diversity. Pixel download remains unauthorized pending manual logged-in Terms confirmation.

Plan rows	Groups	Pixels downloaded	Terms status
64	13	0	BLOCKED — manual logged-in confirmation required

Acquisition candidates 1–12

Terms and attribution gate

Topic	Project Rule
Public imagery licence guidance	Keep image link, contributor and licence attribution with every later downloaded image or crop.
Attribution format	Use a per-image attribution record; verify the applicable CC BY-SA version before download.
API/download conditions	Do not download pixels until the logged-in Terms are manually reviewed for this project.
Logged-in Terms	User must open the Terms while logged in and confirm academic image download/use before pixel acquisition.
Derived crops and report images	Treat crops and report publication as blocked until Terms are confirmed; preserve attribution and share-alike obligations.
Private repository storage	Do not store pixels in the repository until the logged-in Terms or Mapillary support expressly confirms the workflow.

No pixels may be downloaded until the user manually reviews the logged-in Mapillary Terms and confirms the proposed academic-use, derived-crop, report-image and private-storage workflow.
