

Expanded India Mapillary metadata discovery

Authenticated metadata-only retrieval completed 2026-09-01T17:31:29+00:00. Search boxes: 146; successful: 146; API metadata requests: 496; image pixels downloaded: 0.

Project Class	R07 Metadata Candidates	New Unique Metadata Candidates	Combined Metadata Candidates	Combined Conservative Groups	Ready For Pixel Acquisition
stop	15	112	127	27	yes
maximum_speed_limit_50_km_h	4	4	8	3	no
no_left_turn	5	177	182	26	yes

Systematic search coverage

Coverage adds curated Indian cities/towns plus eight non-overlapping outer tiles around each of ten major cities. It excludes every previous r07 centre box and never queries no_parking as an active target. Exact target taxonomies are filtered client-side from traffic-sign map features.

Search Type	Boxes	Successful	Exact Hits	Possible Truncations
additional_city_or_town	66	66	15	0
non_overlapping_major_city_ring	80	80	41	0

Exact taxonomy and readiness

Project Class	Exact Taxonomy Labels Observed	Remaining Photo Target Before Review	Remaining Group Target Before Review	Ready For Pixel Acquisition
stop	regulatory--stop--g1;regulatory--stop--g10	30	15	yes
maximum_speed_limit_50_km_h	regulatory--maximum-speed-limit-50--g1	30	15	no
no_left_turn	regulatory--no-left-turn--g1;regulatory--no-left-turn--g2	29	14	yes

Readiness is metadata availability only. No candidate is visually approved, and no metadata count is added to the approved-photograph totals.

Conservative dependency groups

Project Class	Groups	Candidate Images	Multi Frame Groups
maximum_speed_limit_50_kmh	3	8	3
no_left_turn	26	182	26
stop	27	127	27

Grouping joins shared map-feature IDs, shared image evidence, signs within 20 metres, and signs within 75 metres when contributor/sequence and capture-time evidence also agree. Repeated frames never count as independent.

Terms, attribution and storage gate

Topic	Verification Status
Public imagery licence guidance	public_guidance_verified
Attribution format	public_guidance_verified
API/download conditions	public_guidance_verified_terms_pending
Logged-in Terms	manual_logged_in_confirmation_required
Derived crops and report images	conditional_not_authorized_yet
Private repository storage	unresolved_blocker

The public CC BY-SA and attribution guidance is recorded. The logged-in Terms page was not accessible to this research session, so pixel download, derived crops, report-image publication and persistent private-repository storage remain blocked pending manual verification.

Exact next action

Review the combined candidate and dependency-group tables. For any class marked ready, manually review the logged-in Terms and confirm the attribution/storage workflow. Only then may a separate explicitly approved phase request image pixels. Classes still below 30 metadata candidates or 15 conservative groups require another acquisition source or user-captured photographs; quality thresholds must not be lowered.
