

# Baseline V2 Final Review Report

## Final review counts

| Status   | Count |
|----------|-------|
| approved | 412   |
| rejected | 118   |
| relabel  | 0     |
| pending  | 0     |

Viability rule: at least 10 approved photographs and at least 8 independent approved perceptual groups. The rule was not changed.

## Per-class viability

| Class                       | Candidates | Approved | Rejected | Groups | Viable | Reason                                                        |
|-----------------------------|------------|----------|----------|--------|--------|---------------------------------------------------------------|
| filling_station             | 21         | 21       | 0        | 21     | yes    | —                                                             |
| gap_in_median               | 13         | 13       | 0        | 13     | yes    | —                                                             |
| give_way                    | 21         | 18       | 3        | 16     | yes    | —                                                             |
| hairpin_bend_ahead          | 23         | 23       | 0        | 19     | yes    | —                                                             |
| left_curve_ahead            | 29         | 26       | 3        | 22     | yes    | —                                                             |

## Group-safe split

Per class, sort groups deterministically, apply a seed-42 stable shuffle for tie ordering, then use dynamic programming to assign each complete perceptual group to train/validation/test. Select the reachable non-empty allocation minimizing squared sample-count deviation from 70/15/15; deterministic lexical assignment breaks exact ties.

| Split      | Samples | Target ratio | Actual ratio | Deviation |
|------------|---------|--------------|--------------|-----------|
| train      | 287     | 70.00%       | 69.66%       | -0.34%    |
| validation | 62      | 15.00%       | 15.05%       | +0.05%    |
| test       | 63      | 15.00%       | 15.29%       | +0.29%    |

## Per-class split counts

| Class                      | Train | Validation | Test | Total |
|----------------------------|-------|------------|------|-------|
| filling_station            | 15    | 3          | 3    | 21    |
| gap_in_median              | 9     | 2          | 2    | 13    |
| give_way                   | 12    | 3          | 3    | 18    |
| hairpin_bend_ahead         | 16    | 3          | 4    | 23    |
| left_curve_ahead           | 18    | 4          | 4    | 26    |
| major_road_ahead           | 11    | 2          | 3    | 16    |
| maximum_speed_limit_30_kmh | 11    | 2          | 3    | 16    |
| maximum_speed_limit_40_kmh | 14    | 3          | 3    | 20    |
| maximum_speed_limit_80_kmh | 13    | 3          | 3    | 19    |
| no_entry                   | 10    | 2          | 2    | 14    |
| no_right_turn              | 8     | 2          | 1    | 11    |
| pass_either_side           | 8     | 2          | 1    | 11    |
| pedestrian_crossing_ahead  | 44    | 9          | 10   | 63    |
| right_curve_ahead          | 22    | 5          | 4    | 31    |
| road_hump                  | 37    | 8          | 8    | 53    |
| school_ahead               | 26    | 6          | 6    | 38    |
| side_road_right            | 13    | 3          | 3    | 19    |

## Leakage and safety checks

| Check                                     | Result | Details |
|-------------------------------------------|--------|---------|
| duplicate_review_ids                      | PASS   | []      |
| duplicate_source_image_ids                | PASS   | []      |
| exact_duplicate_groups                    | PASS   | []      |
| near_duplicate_pair_group_inconsistencies | PASS   | []      |
| cross_label_perceptual_group_conflicts    | PASS   | []      |
| split_perceptual_group_overlap            | PASS   | []      |
| split_source_image_overlap                | PASS   | []      |
| split_review_id_overlap                   | PASS   | []      |

## Excluded classes

| Class      | Reason                                                        |
|------------|---------------------------------------------------------------|
| one_way    | approved photographs 0 < 10; approved perceptual groups 0 < 8 |
| stop       | approved photographs 0 < 10; approved perceptual groups 0 < 8 |
| y_junction | approved photographs 0 < 10; approved perceptual groups 0 < 8 |

Test-use policy: the test split is held out and must not be used for model selection. Validation macro F1 selects checkpoints. No model training or evaluation was performed in this phase.
